

se deberá resolver encuentro de revestimiento siding con el existente de madera a través de piezas del sistema que permitan hermeticidad

Figure 33.27 shows a schematic diagram of a two-panel window. The window is divided into two vertical panels by a central mullion. Each panel contains a dense pattern of small, light-colored dots. The left panel is labeled "outside view, no L." and the right panel is labeled "inside view, no L.". The entire window assembly is set within a frame. A red circle highlights a small detail in the top-left corner of the frame.
